Who we are

DeZaSearch is a Consulting company that specializes in executive recruitment services for select multinational and national companies.

DeZaSearch was established in 1991, seeking to focus the existing recruitment methodology toward the creation and capture of added value for our customers through the formation of high level relational networks in Latin America on one hand, and on the development of international strategic alliances, on the other.

The roots of DeZaSearch are formed by the convergence of several business management experiences which, in a span of more than 26 years of uninterrupted professional practice, are evidenced as a wealth of acquired knowledge and relationships which give us substance.
